In the back of this catalog will be found a chart giving prepaid prices on small quantity orders, as well as other information relative to bulb sale conditions.

We have found it necessary to discontinue a "quantity" list. In the future we shall confine our efforts to testing and growing in reasonable quantities the newer and most outstanding imported varieties we can find. By growing a slightly smaller acreage we can, we believe, give all the operations from planting, to growing, to harvesting and storing closer attention. This will insure better quality performers and only top quality bulbs being harvested for sale.

In 1957 despite an acreage cut, the resulting crop, due to most favorable weather, has resulted in our having available the finest bulbs we have ever grown. Fully 95% of the crop to be sold will have been bulblet grown or grown from size 4, 5 and 6 planting stock.

This year you will find several new things amongst the DUTCH IMPORTED varieties. In every case the bulbs of these varieties—the best of many tested each year—will be lowa grown at least one year or more. Only those varieties which grew and produced fine flowers for us are offered.

Also this year as in the past we are offering several new 1958 introductions, particularly from our Canadian friends. There are several varieties in this group which promise to do a most outstanding job and will become popular additions to the collection of any grower. All the varieties have been widely tested and you can rest assured that their performance will please.

We do not generally praise any individual varieties, but this past year there were a number of outstanding individuals that we shall list here a few that we noted during the season as performing better than usual.

In the whites: White Plume and South Pole topped them all; Cream, Lorelei, Ericsson and Cymbaline; Yellow, Gold for color, Lodestar for cutting; Orange, Orange Gold needs improving; Light Pink, a newcomer in Monogram.

Pink, Coral Ace, King Size and Paul Bunyon—all giants, this year exceptional all of them; Deep Pink, Friendship, Spic and Span; Scarlet, an outstanding Dutch variety Gloriana; Red, Harrisburger at the head of the list followed by Poinsettia and Early Red.

Dark Red, easily won by Toean and stretchy Negus. Neither showed a bit of burn; Purples, easily King David and Merry Widow.

Blues are really good now with Sailor Boy at the head of the light blues, Blue Peter taking top honors in the darker class. Lavenders, our best, Lavender Beauty, Tyrone and Balmoral.

In the smokey class, Patmos, Buckeye Bronze, Okinawa did the best job.

In picking the best three our choice would be, first, Harrisburger; second, Gloriana and third, the amazing white, White Plume. Most beautiful—Francesca.

May yours grow better and better in '58!

Leonard W. Butt's 1958 Introductions

Ten splendid new varieties are offered for 1958 and they are backed up by our own rigid testing and by their performance in the Trial Grounds. This may seem to be a large group for any one year, but both the Butterfly and Miniature classes need more population and we feel that these varieties will materially help.

LARGE FLOWERED VARIETIES

MEDALIST (450) (Radiance X Animation) (Early Midseason)

This splendid, light red is brightened by a fine, white stripe on each lower petal and very closely resembles its famous seed parent Radiance.

Medalist grows strongly (50") and straight and blooms early, just after Friendship. The small bulbs, even 5's and 6's bloom in late fall extremely well, thus providing a succession of bloom throughout the season.

The 7-8 open florets are well placed and attached; 6-7 in color out of the 18-20 total buds. In three successive years in the trial grounds it rated Honorable Mention in 1955 and 1957 and a Silver Medal Award in 1956, thus proving it is a consistently good performer.

OLYMPIA (564) (Seedling X Evangeline) (Midseason)

There are all too few glads in this deep rose class that are as large as Olympia. We have always regarded this as a rose magna and the small white bars in the lower petals light it up and add to its attractiveness.

Plants are tall, 55" to 60", spikes straight and stretchy 24/26" with lots of handle. Opens 8 well placed florets and one spike is a whole bouquet. For some unknown reason this was never submitted to the Trial Grounds, but as it has grown over the past few years here it is most promising.

ROSEATE (462) (Spic & Span X Wayfarer) (Midseason)

In all its trial years as a seedling this has always been an outstanding performer. It's been known as "the Rose Spic & Span" because it is a beautiful rose pink with a white throat and it makes tall, straight, spikes which easily open 8 florets at once. Its virtue is further attested by the Trial Grounds' judges who awarded it **Silver and Gold Medals**.

Its green, healthy plants attain a height of 60" with 28"-30" flower heads and 18-20 buds. **Roseate** has just everything a good glad needs to attain stardom — colour — size — uniformity and is an easy cutter with virtually 100% top grade spikes; no short heads.

For commercial or show purposes a winner!

BUTTERFLY VARIETIES

GLADIATOR (336) (Peter Pan X Seedling) (Midseason)

Just out of this world for colour and form. It's a flaming scarlet of a "different" colour, closely resembling a carnation red. In form it's ruffled, really ruffled, needlepointed too.

Spikes are always straight, 50" in height, 18-20 buds, 6-7 open florets, well placed and attached. **Gladiator** is a real butterfly and lends itself to artistic arrangements. Submitted only once to the Trial Grounds it earned a **Silver Medal** with a high score of 89.

Florists who cater to a top trade just couldn't get enough of this variety to satisfy the demand. Truly one of nature's masterpieces!

JETFIRE (324) (Statuette X Seedling) (Early Midseason)

An unusual colour combination. Apricot red with a yellow throat, on which is a fiery red thumb print.

Modestly ruffled like its seed parent it has also the same opening qualities—eight well placed florets at once.

Spikes are straight, 38"-40" in height, 15-17 buds. Excellent in arrangements and is an exhibition variety as well. **Silver and Gold Medals** from the Trial Grounds and an Award of Merit from the British Gladiolus Society, stamp this as a proven introduction. **Jetfire** is a bright, cheerful butterfly.

METEORITE (312) (Crinklette X Sprite) (Midseason)

A rich golden yellow, absolutely unmarked and devoid of any other colour. Sparkling colour throughout and really ruffled.

Spikes are always straight, 40" in height, 18-20 buds with 8 to 10 open florets. In size just above the miniatures. This fits in extremely well for arrangements and will hold its own on the show bench as it opens so many in precise arrangement.

MINIATURE VARIETIES

CALYPSO (211) (Statuette X Seedling) (Early)

A splendid, ruffled miniature yellow with a few subdued throat feathers that do not detract from its colour.

A splendid grower with straight spikes averaging 43 to 45 inches, 16 to 18 buds and 7 to 8 open on stretchy heads 20 to 22 inches.

Calypso can win on the show bench as well as being ideal for arrangements.

MEDLEY (132) (Red Button X Statuette) (Early Midseason)

This light salmon red miniature is only slightly ruffled but has a number of important virtues that make it very worthwhile.

The florets are wide open, not at all hooded, 7 to 8 open at once and they are small in size—a real 100 glad. Most glads of this size do not exhibit true show qualities so we predict many successes for **Medley** at the shows.

APEX (222) (Bo-Peep X Seedling) (Early)

Spikes 38"-40", spikes straight, attachment and facing of florets excellent. Received an Honorable Mention from the Trial Grounds.

Deep apricot pink with a yellow throat dusted rose and deeply ruffled florets, scarcely conveys the beauty of this outstanding miniature. Field notes each year mark it "Excellent colour and form."

Spikes straight, about 40" in height; 15 to 16 buds, 6 to 7 open florets, well placed and attached. A splendid addition to our ruffled miniatures and extremely useful for arrangements and a strong competitor on the show bench.

Honorable Mention in the Trial Grounds.

QUEST (242) (Bo-Peep X Seedling) (Early Midseason)

This medium pink with yellow throat is splendid example of the best in ruffled miniatures. Outstanding form and texture and a smooth attractive colour go hand in hand with excellent plant habits.

Spikes 42 to 44 inches, 18 to 20 buds, 7 to 8 open florets well placed and attached factually describe it. You must see it, however, to appreciate its fresh colour. Individually or in arrangements **Quest** is tops.

All America Gladiolus

EMPEROR

EMPEROR (Fischer Baerman) 85 days 471

The newest member of the ALL AMERICA GLADS and as they describe it — regal purple trimmed in white — a rich and distinctive color. Five foot spikes, 7 to 8 open round recurved florets — sounds interesting and worthy of more than a casual look.

MAYTIME

MAYTIME (Baerman Fischer 57 70 days 442)

Eight to ten open florets of deep pure pink, offset with an attractive white throat. Tall somewhat wiry spikes. An attractive color and an easy grower. If we had to choose between all of the All America Glads, Maytime would be given very serious consideration.

CARIBBEAN

CARIBBEAN (Baerman Fischer 57) 70 days 376

A nice blue-violet floret, a deep rich violet throat and small cream spear create a nice arrangement glad. Sort of a delicate blue color is the overall effect. Holds six to ten open on a medium tall straight spike of nice proportions. It might be criticized for the color of the partially opened buds, but otherwise quite nice. A good one for arrangement work where its color is extremely useful.

ROYAL STEWART

ROYAL STEWART (Pommert 56) 75 days 450

Long tall spikes holding eight or more clear light red florets on a well balanced spike. Color itself is quite nice, but is somewhat reduced in value by the throat marking which could be more attractive. For performance, consistently, you will like Royal Stewart.

APPLE BLOSSOM

APPLE BLOSSOM (Baerman Fischer 56) 70 days 460

A corona of cool rose pink, snow white florets, a nice combination of colors. Made up alone, they seem to lose a lot of their beauty, but with a focal point of darker pink, one can really appreciate the full beauty of Apple Blossom. A vigorous grower, medium heavy in substance, with some ruffling. Holds six or more open on a medium to tall spike. We would still list it as a 360 for average growing.

PRICE—Large bulbs only—No. 1 size as far as possible

50c each—12 for \$5.00 (6 for \$2.50)

One each of the five varieties \$2.25

Each variety is patented and the right to reproduce All America varieties for resale or to sell cut flowers is restricted.
